

## **Ulkomaisten tutkimusten kartoitus (vuonna 2018 julkaistuja artikkeleita)**

koonnut Anna Kiviniemi-Pulli

Käytetyt viitetietokannat:

PubMed, Scopus, Science Direct, ResearchGate

### **Kieli ja puhe**

**Boosting syntax training with temporally regular musical primes in children with cochlear implants.** Bedoin, N., Besombes, A.M., Escande, E., Dumont, A., Lalitte, P., & Tillmann, B. (2018). *Annals of Physical and Rehabilitation Medicine*, 61(6), 365–371.

**Spoken language and everyday functioning in 5-year-old children using hearing aids or cochlear implants.** Cupples, L., Ching, T.Y., Button, L., Seeto, M., Zhang, V., Whitfield, J., Gunnourie, M., Martin, L., & Marnane, V. (2018). *International Journal of Audiology*, 57(sup2), s55–s69.

**Spontaneous language production of Italian children with cochlear implants and their mothers in two interactive contexts.** Majorano, M., Guidotti, L., Guerzoni, L., Murri, A., Morelli, M., Cuda, D., & Lavelli, M. (2018). *International Journal of Language and Communication Disorders*, 53(1), 70–84.

**Differences and similarities in early vocabulary development between children with hearing aids and children with cochlear implant enrolled in 3-year auditory verbal intervention.** Percy-Smith, L., Hallstrøm, M., Josvassen, J.L., Mikkelsen, J.H., Nissen, L., Dieleman, E., & Cayé-Thomasen, P. (2018). *International Journal of Pediatric Otorhinolaryngology*, 108, 67–72.

**Children with cochlear implants in infancy: predictors of early vocabulary.** Bavin, E.L., Sarant, J., Leigh, G., Prendergast, L., Busby, P., & Peterson, C. (2018). *International Journal of Language & Communication Disorders*, 53(4), 788–798.

**Profound hearing loss: Addressing barriers to hearing healthcare.** Pratt, S. R. (2018). *Seminars in Hearing*, 39(4), 428–436.

**Basic Measures of Prosody in Spontaneous Speech of Children With Early and Late Cochlear Implantation.** van de Velde, D.J., Frijns, J.H.M., Beers, M., van Heuven, V.J., Levelt, C.C., Briaire, J., & Schiller, N.O. (2018). *Journal of Speech, Language, and Hearing Research*, *61*(12), 3075–3094.

**The relationships among verbal ability, executive function, and theory of mind in young children with cochlear implants.** Liu, M., Wu, L., Wu, W., Li, G., Cai, T., & Liu, J. (2018). *International Journal of Audiology*, *57*(12), 875–882.

**Language Outcomes Improved Through Early Hearing Detection and Earlier Cochlear Implantation.** Yoshinaga-Itano, C., Sedey, A.L., Wiggin, M., & Mason, C.A. (2018). *Otology & Neurotology*, *39*(10), 1256–1263.

**Working Memory Function in Children with Single Side Deafness Using a Bone-Anchored Hearing Implant: A Case-Control Study.** Di Stadio, A., Dipietro, L., Toffano, R., Burgio, F., De Lucia, A., Ippolito, V., Garofalo, S., Ricci, G., Martines, F., Trabalzini, F., & Della Volpe, A. (2018). *Audiology and Neurotology*, *23*(4), 238–244.

**Effects of FM system fitted into normal hearing ear on speech-in-noise recognition in Japanese school-aged children with unilateral severe-to-profound hearing loss.** Shimada, A., Udaka, J., Nagashima, H., Chiba, I., Kondo, E., Nakano, S., Okamoto, H., & Takeda, N. (2018). *The Journal of Medical Investigation*, *65*(3.4), 216–220.

**Phonological Development in a Bilingual Arabic-English-Speaking Child With Bilateral Cochlear Implants: A Longitudinal Case Study.** Sabri, M., & Fabiano-Smith, L. (2018). *American Journal of Speech-Language Pathology*, *27*(4), 1506–1522.

**Impact of Consistency in Daily Device Use on Speech Perception Abilities in Children with Cochlear Implants: Datalogging Evidence.** Easwar, V., Sanfilippo, J., Papsin, B., & Gordon, K. (2018). *Journal of The American Academy of Audiology*, *29*(9), 835–846.

**Using Microphone Technology to Improve Speech Perception in Noise in Children with Cochlear Implants.** Johnstone, P.M., Mills, K.E.T., Humphrey, E., Yeager, K.R., Jones, E., McElligott, K., Pierce, A., Agrawal, S., Froeling, C., & Little, J.P. (2018). *Journal of the American Academy of Audiology*, *29*(9), 814–825.

**Development of Phonological, Lexical, and Syntactic Abilities in Children With Cochlear Implants Across the Elementary Grades.** Nittrouer, S., Muir, M., Tietgens, K., Moberly, A.C., & Lowenstein, J.H. (2018). *Journal of Speech, Language, and Hearing Research*, *61*(10), 2561–2577.

**Pairing New Words With Unfamiliar Objects: Comparing Children With and Without Cochlear Implants.** Lund, E. (2018). *Journal of Speech, Language, and Hearing Research*, *61*(9), 2325–2336.

**Preference for Infant-Directed Speech in Infants With Hearing Aids: Effects of Early Auditory Experience.** Wang, Y., Bergeson, T.R., & Houston, D.M. (2018). *Journal of Speech, Language, and Hearing Research*, *61*(9), 2431–2439.

**Relationship between Electrically Evoked Compound Action Potential Thresholds and Auditory, Language, and Speech Progress after Cochlear Implant Surgery.** Motasaddi Zarandy, M., Nourizadeh, N., Mobedshahi, F., & Jafarzadeh, S. (2018). *Iranian Journal of Otorhinolaryngology*, *30*(99), 185–188.

**Executive Function in Deaf Children: Auditory Access and Language Access.** Hall, M.L., Eigsti, I.M., Bortfeld, H., & Lillo-Martin, D. (2018). *Journal of Speech, Language, and Hearing Research*, *61*(8), 1970–1988.

**Language development in the pediatric cochlear implant patient.** Ruben, N.J. (2018). *Laryngoscope Investigative Otolaryngology*, *3*(3), 209–213.

**The effects of narrative-based language intervention (NBLI) on spoken narrative structures in Persian-speaking cochlear implanted children: A prospective randomized control trial** Zamani, P., Soleymani, Z., Jalaie, S., & Zarandy, M.M. (2018). *International Journal of Pediatric Otorhinolaryngology*, *112*, 141–150.

**Outcomes after cochlear implant provision in children with cochlear nerve hypoplasia or aplasia.** Ehrmann-Müller, D., Kühn, H., Matthies, C., Hagen, R., & Shehata-Dieler, W. (2018). *International Journal of Pediatric Otorhinolaryngology*, *112*, 132–140.

**Language processing fluency and verbal working memory in prelingually deaf long-term cochlear implant users: A pilot study.** Kronenberger, W.G., Henning, S.C., Ditmars, A.M., & Pisoni, D.B. (2018). *Cochlear Implants International*, 19(6), 312–323.

**A comparison of morpho-syntactic abilities in deaf children with cochlear implant and 5-year-old normal-hearing children.** Golestani, S.D., Jalilevand, N., & Kamali, M. (2018). *International Journal of Pediatric Otorhinolaryngology*, 110, 27–30.

**Prosodic Boundary Effects on Syntactic Disambiguation in Children With Cochlear Implants.** Fortunato-Tavares, T., Schwartz, R.G., Marton, K., de Andrade, C.F., & Houston, D. (2018). *Journal of Speech, Language, and Hearing Research*, 61(5), 1188–1202.

**Language and speech outcomes of children with hearing loss and additional disabilities: identifying the variables that influence performance at five years of age.** Cupples, L., Ching, T.Y.C., Button, L., Leigh, G., Marnane, V., Whitfield, J., Gunnourie, M., & Martin, L. *International Journal of Audiology*, 57(sup2), s93–s104.

**Speech perception in children with cochlear implants for continua varying in formant transition duration.** Blankenship, K.G., Ohde, R.N., Won, J.H., & Hedrick, M. (2018). *International Journal of Speech-Language Pathology*, 20(2), 238–246.

**Auditory Cognitive Training for Pediatric Cochlear Implant Recipients.** Mishra, S.K., & Boddupally, S.P. (2018). *Ear & Hearing*, 39(1), 48–59.

**Factors influencing speech perception in noise for 5-year-old children using hearing aids or cochlear implants.** Ching, T.Y., Zhang, V.W., Flynn, C., Burns, L., Button, L., Hou, S., McGhie, K., & Van Buynder, P. (2018). *International Journal of Audiology*, 57(sup2), s70–s80.

**Early vocabulary development in children with bilateral cochlear implants.** Välimaa, T., Kunnari, S., Laukkanen-Nevala, P., Lonka, E., & National Clinical Research Team. (2018). *International Journal of Language & Communication Disorders*, 53(1), 3–15.

**Profiling morpho-syntactical development of cochlear implanted children with TR-LARSP.** Yaşar, Ö.C., & Topbaş, S. (2018). *Clinical Linguistics & Phonetics*, 32(3), 181–192.

**Auditory verbal habilitation is associated with improved outcome for children with cochlear implant.** Percy-Smith, L., Tønning, T.L., Josvassen, J.L., Mikkelsen, J.H., Nissen, L., Dieleman, E., Hallstrøm, M., & Cayé-Thomasen, P. (2018). *Cochlear Implants International*, 19(1), 38–45.

**Word Learning in Children With Cochlear Implants: Examining Performance Relative to Hearing Peers and Relations With Age at Implantation.** Pimperton, H., & Walker, E.A. (2018). *Ear and Hearing*, 39(5), 980–991.

**How does a bilingual environment affect the results in children with cochlear implants compared to monolingual-matched children? An Italian follow-up study.** Forli, F., Giuntini, G., Ciabotti, A., Bruschini, L., Löfkvist, U., & Berrettini, S. (2018). *International Journal of Pediatric Otorhinolaryngology*, 105, 56–62.

**Cochlear implantation in children with auditory neuropathy spectrum disorder: A multicenter study on auditory performance and speech production outcomes.** Daneshi, A., Mirsalehi, M., Hashemi, S.B., Ajalloueyan, M., Rajati, M., Ghasemi, M.M., Emamdjomeh, H., Asghari, A., Mohammadi, S., Mohseni, M., Mohebbi, S., & Farhadi, M. (2018). *International Journal of Pediatric Otorhinolaryngology*, 108, 12–16.

**Phonological processes in the speech of school-age children with hearing loss: Comparisons with children with normal hearing.** Asad, A.N., Purdy, S.C., Ballard, E., Fairgray, L., & Bowen, C. (2018). *Journal of Communication Disorders*, 74, 10–22.

**Speech intelligibility of school-aged children with cochlear implants.** Shirai, K., Saito, Y., Kawano, A., Tomizawa, A., Nonami, N., Ayusawa, E., & Tsukahara, K. (2018). *Journal of Otolaryngology of Japan*, 121(3), 201–209.

## **Sosio-emotionaaliset vaikutukset**

**Early prelingual auditory development in Italian infants and toddlers analysed through the Italian version of the Infant-Toddler Meaningful Auditory Integration Scale (IT-MAIS).**

Cavicchiolo, S., Mozzanica, F., Guerzoni, L., Murri, A., Dall'Ora, I., Ambrogi, F., Barozzi, S., Cuda, D., & Schindler, A. (2018). *European Archives of Oto-Rhino-Laryngology*, 275(2), 615–622.

**Benefit of Cochlear Implantation in Children with Multiple-handicaps: Parent's Perspective.**

Nasralla, H.R., Montefusco, A.M., Hoshino, A.C.H., Samuel, P.A., Magalhães, A.T.M., Goffi-Gomez, M.V.S., Tsuji, R.K., & Bento, R.F. (2018). *International Archives of Otorhinolaryngology*, 22(4), 415–427.

**Early experience and health related quality of life outcomes following auditory**

**brainstem implantation in children.** Asfour, L., Friedmann, D.R., Shapiro, W.H., Roland, J.T. Jr, & Waltzman, S.B. *International Journal of Pediatric Otorhinolaryngology*, 113, 140–149.

**Bedouin Hearing Parents of Children With Hearing Loss: Stress, Coping, and Quality of Life.**

Levinger, M., & Alhuzail, N.A. (2018). *American Annals of the Deaf*, 163(3), 328–355.

**Satisfaction with Life among Mothers of Pediatric Cochlear Implant Candidates: The Impact of Implant Operation and Sociodemographic Factors.**

Yiğit, E., Edizer, D.T., Durna, Y.M., Altay, M.A., & Yiğit, Ö. (2018). *The Journal of International Advanced Otology*, 14(2), 202–207.

**Parents' Perception of Health-Related Quality of Life in Children With Cochlear Implants: The Impact of Language Skills and Hearing.**

Haukedal, C.L., von Koss Torkildsen, J., Lyxell, B., & Wie, O.B. (2018). *Journal of Speech, Language, and Hearing Research*, 61(8), 2084–2098.

**Effects of family environment features on cochlear-implanted children.**

Necula, V., Cosgarea, M., & Maniu, A.A. (2018). *European Archives of Oto-Rhino-Laryngology*, 275(9), 2209–2217.

**A questionnaire-based analysis of parental perspectives on pediatric cochlear implant (CI)**

**re/habilitation services: a pilot study from a developing CI service in India.**

Dev, A.N., Lohith, U., Pascal, B., Dutt, C.S., & Dutt, S.N. (2018). *Cochlear Implants International*, 19(6), 338–349.

**The parents' perspective of the early diagnostic period of their child with hearing loss:**

**information and support.** Scarinci, N., Erbası, E., Moore, E., Ching, T.Y.C., & Marnane, V.

*International Journal of Audiology*, 57(sup2), s3–s14.

**Evaluation of quality of life after paediatric cochlear implantation.** Byčkova, J., Simonavičienė, J., Mickevičienė, V., & Lesinskas, E. (2018). *Acta Medica Lituanica*, 25(3), 173–184.

**Quality of life outcomes in cochlear implantation of children with profound and multiple learning disability.** Speaker, R.B., Roberston, J., Simoes-Franklin, C., Glynn, F., Walshe, P., & Viani, L. (2018). *Cochlear Implants International*, 19(3), 162–166.

**Vocal Emotion Identification by Children Using Cochlear Implants, Relations to Voice Quality, and Musical Interests.** Waaramaa, T., Kukkonen, T., Mykkänen, S., & Geneid, A. (2018). *Journal of Speech, Language, and Hearing Research*, 61(4), 973–985.

**Social Development in Children With Early Cochlear Implants: Normative Comparisons and Predictive Factors, Including Bilateral Implantation.** Sarant, J.Z., Harris, D.C., Galvin, K.L., Bennet, L.A., Canagasabay, M., & Busby, P.A. (2018). *Ear and Hearing*, 39(4), 770–782.

**Cochlear implant: the family's perspective.** Vieira, S.S., Dupas, G., & Chiari, B.M. (2018). *Cochlear Implants International*, 19(4), 216–224.

## **Koulu**

**Reading and speech intelligibility of a child with auditory impairment and cochlear implant.** Lucchesi, F.M., Almeida-Verdu, A.C.M., & de Souza, D.G. (2018). *Psychology and Neuroscience*, 11(3), 306–316.

**Relation among the knowledge of teachers about hearing loss degree, technological devices and communication strategies.** Santos, F.R.D., & Delgado-Pinheiro, E.M.C. *CoDAS*, 30(6).

**Evaluation of gap filling skills and reading mistakes of cochlear implanted and normally hearing students.** Çizmeci, H., & Çiprut, A. (2018). *International Journal of Pediatric Otorhinolaryngology*, 109, 27–30.

**Assessment of narrative writing by Persian-speaking students with hearing impairments.**

Zamani, P., Soleymani, Z., Mousavi, S.M., & Akbari, N. (2018). *Clinical Otolaryngology*, 43(3), 904–911.

**Evaluation of the Reading and Writing Skills of Children with Cochlear Implants.** Çizmeci, H., &

Çiprut, A. (2018). *The Journal of International Advanced Otolaryngology*, 14(3), 359–364.

**Relationship between working memory and comprehension and expression of grammar in Farsi-speaking children with cochlear implants.** Khoramian, S., & Soleymani, Z. (2018). *International Journal of Pediatric Otorhinolaryngology*, 113, 240–247.

**The Role of Statistical Learning in Understanding and Treating Spoken Language Outcomes in Deaf Children With Cochlear Implants.** Deocampo, J.A., Smith, G.N.L., Kronenberger, W.G., Pisoni, D.B., & Conway, C.M. (2018). *Language, Speech, and Hearing Services in Schools*, 49(3S), 723–739.

**Comparative analysis of cognitive-linguistic evaluation in normal hearing school children and users of cochlear implants.** Martins, C.I.S., Queiroga, B.A.M., Rosal, A.G.C., & Cordeiro, A.A.A. (2018). *CoDAS*, 30(4).

**Verbal learning and memory in prelingually deaf children with cochlear implants.** Kronenberger, W.G., Henning, S.C., Ditmars, A.M., Roman, A.S., Pisoni, D.B. (2018). *International Journal of Audiology*, 57(10), 746–754.

**Spoken and Written Narrative in Persian-Speaking Students Who Received Cochlear Implantand/or Hearing Aid.** Zamani, P., Soleymani, Z., Rashedi, V., Farahani, F., Lotf, G., & Rezaei, M. *Clinical and Experimental Otorhinolaryngology*, 11(4), 250–258.

**Computer-assisted reading intervention for children with sensorineural hearing loss using hearing aids: Effects on auditory event-related potentials and mismatch negativity.**

Engström, E., Kallioinen, P., Nakeva von Mentzer, C., Lindgren, M., Ors, M., Sahlén, B., Lyxell, B., & Uhlén, I. (2018). *International Journal of Pediatric Otorhinolaryngology*, 117, 17–25.

**Literacy Outcomes in Deaf Students with Cochlear Implants: Current State of the Knowledge.**

Mayer, C., & Trezek, B.J. (2018). *Journal of Deaf Studies and Deaf Education*, 23(1), 1–16.

**Differences in self-advocacy among hard of hearing and typical hearing students.**

Michael, R., & Zidan, H.M. (2018). *Research in Developmental Disabilities*, 72, 118–127.

## **Muuta**

**Surgical and functional outcomes of cochlear implantation in post-lingual and cross-over patients: First 5-year review of the National Ministry of Health Malaysia cochlear implant programme.**

Philip Rajan, D., Siti Sabzah, M.H., Zulkiflee, S., Tengku Mohamed, I., Kumareysh Vijay, V., Iskandar, H., Sobani, D., Valuyeetham, K.A., Shahrul, A., Mas, D., Azyani, N., Farah, D., Azmawanie, A., Noormala, A., Norhana, S., Shahrom, A., & Amirudin, M. (2018). *Medical Journal of Malaysia*, 73(6), 393–396.

**Formant priority channel selection for an "n-of-m" sound processing strategy for cochlear implants.**

Saba, J.N., Ali, H., & Hansen, J.H.L. (2018). *The Journal of the Acoustical Society of America*, 144(6), 3371.

**Cochlear Implantation for Children and Adults with Severe-to-Profound Hearing Loss.**

Entwisle, L.K., Warren, S.E., & Messersmith, J.J. (2018). *Seminars in Hearing*, 39(4), 390–404.

**Outcomes of cochlear implantations for mumps deafness: A report of four pediatric cases.**

Katsushika, M., Kashio, A., Ogata, E., Akamatsu, Y., Hoshi, Y., Iwasaki, S., & Yamasoba, T. (2018). *International Journal of Pediatric Otorhinolaryngology*, 114, 76–79.

**Cochlear implantation in children with congenital long QT syndrome: Introduction of an evidence-based pathway of care.**

Scott-Warren, V., Bendon, A., Bruce, I.A., Henderson, L., & Diacono, J. (2018). *Cochlear Implants International*, 19(6), 350–354.

**Unilateral Versus Bilateral Cochlear Implantation in Children With Auditory Neuropathy Spectrum Disorder (ANSO).**

Nassiri, A.M., Yawn, R.J., Brown, C.L., O'Malley, M.R., Bennett, M.L., Labadie, R.F., Haynes, D.S., & Rivas, A. (2018). *Otology & Neurotology*, 39(9), 810–816.

**Limiting asymmetric hearing improves benefits of bilateral hearing in children using cochlear implants.** Polonenko, M.J., Papsin, B.C., & Gordon, K.A. (2018). *Scientific Reports*, 8(1).

**Cochlear implantation in children with CHARGE syndrome: a report of eight cases.** Vincenti, V., Di Lella, F., Falcioni, M., Negri, M., & Zanetti, D. (2018). *European Archives of Oto-Rhino-Laryngology*, 275(8), 1987–1993.

**Complexity: An interpretative phenomenological analysis of the experiences of mothers of deaf children with cochlear implants and autism.** Zaidman-Zait, A., & Curle, D. (2018). *Journal of Health Psychology*, 23(9), 1173–1184.

**The outcome of cochlear implantation among children with genetic syndromes.** Alzhrani, F., Alhussini, R., Hudeib, R., Alkaff, T., Islam, T., & Alsanosi, A. (2018). *European Archives of Oto-Rhino-Laryngology*, 275(2), 365–369.

**Comparisons of visual attention in school-age children with cochlear implants versus hearing peers and normative data.** Hoffman, M., Tiddens, E., Quittner, A.L. & CDaCI Investigative Team. (2018). *Hearing Research*, 359, 91–100.

**Auditory and cognitive development in a partially deaf child with bilateral electro-acoustic stimulation: a case study.** Seebacher, J., Muigg, F., Fischer, N., Weichbold, V., Stephan, K., Zorowka, P., Bliem, H.R., & Schmutzhard, J. (2018). *International Journal of Audiology*, 57(2), 150–155.
